

**Errlectric® Quartz Nail Insert**  
Instructions for Use

1. Ensure your Errlectric® nail's dish is completely clean and clear of any residue or debris before installing the quartz insert.  
We recommend using an Errlectric® titanium nail brush for cleaning titanium nails.
2. Test fit the quartz insert to ensure it installs freely and has a small amount of movement when installed.  
If the insert is tight or does not fit, please contact the factory for a replacement. *Do not force an insert into place.*
3. Remove the insert and turn on your Errlectric® and heat the nail to the desired temperature.  
We recommend 100°F above your normal preferred temperature when using an insert.
4. When the titanium nail is hot, carefully install the insert. Allow the insert to heat for at least one minute before use.
5. To prevent breakage from contraction during cooling and potential residue build-up during use, it is recommended to remove the insert before turning off the heater.

**Warranty** Jibtronix Corporation warrants that all manufactured products are, to the best of its knowledge, free of defective material and workmanship and warrants the Errlectric Quartz Insert for **30 days** from the date of purchase. This warranty is extended to the original purchaser from the date of receipt. This warranty does not cover damages from abuse, accidental breakage, or products that have been modified, altered, or installed in a manner other than that which is specified in the installation instructions. The products which have been claimed and comply with the aforementioned restrictions shall be replaced or repaired at the sole discretion of the Jibtronix Corporation at no charge.
